

Stardraw Control

– Ultimate Control

STARDRAW  2007
ultimate control **CONTROL**

Stardraw.com
eye opening solutions

- Control any device over any protocol
- Create customized User Interfaces
- Host UIs on any PC device
- No programming skills required

STARDRAW CONTROL HAS PROVED TO BE THE MOST POWERFUL CONTROL SOFTWARE AVAILABLE

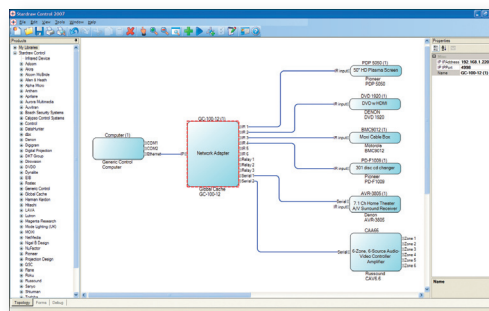

- James Heliker, TVBR Studios, CA

Stardraw Control generates customized control programs that can control any device over any protocol. It is fast and flexible with an ease of use that belies its underlying power: using its drag-drop interface and intuitive design environment, systems can be configured and controlled without having to write a single line of code.

Stardraw Control's open approach to system architecture means that you can utilize off-the-shelf hardware to control any type of system so that overall, Stardraw Control solutions can be deployed at a fraction of the programming time and hardware cost of conventional control systems.

Topology View

- Choose products from a comprehensive listing of thousands of devices from hundreds of different manufacturers
- Click on any device to view and set its properties and functions
- Create products and define inputs/outputs and functions using the Product Wizard.

Topology View

Forms View

- Drag and drop to create custom User Interfaces, or use pre-configured, customizable templates
- Controls include buttons, switches, faders, knobs, dials, meters, alphanumeric displays, images etc, all fully configurable
- Catch and react to any event, and assign any action to any control

Forms View

Control Programs

- Control programs are compiled to self-contained .EXEs that can be run on any Windows system with .NET framework 2.0, including Desktops, Laptops, TabletPCs and UMPCs.
- Control programs can be edited, amended and re-compiled at any time, without additional cost.

UI device shown: PMG Quadpad

Stardraw Control – the fastest, most cost-effective solution for system control

Standard UI Controls	✓	✓
Advanced UI Controls		✓
Calendar Control		✓
Create Unidirectional Drivers	✓	✓
Create Bidirectional Drivers		✓
Generate Standalone .EXEs	✓	✓
Generate Client/Server .EXEs		✓

STARDRAW CONTROL LETS YOU...

- Drag products from a library of thousands
- Drag/drop to show logical connections
- Create custom User Interfaces
- Utilize preconfigured, customizable UI templates or your own custom graphics
- Program UI or Device actions with one click
- Catch any system, device or UI event
- Create Standalone or Client/Server control programs
- Host control programs on any PC device
- Employ off-the-shelf, third-party hardware
- Communicate with devices over IR, RS232, TCP/IP, DMX, CobraNet, EtherSound, MIDI and more

Without having to write code.

STARDRAW CONTROL FEATURES...

- Topology, Forms Designer and Debug windows
- Intuitive Grid Interfaces – define properties without writing code
- Powerful, flexible, vector and bitmap-based UI controls
- One Click programming
- C# script editor for mathematical & logical functions
- Tools to create Uni- and Bi-Directional drivers
- Calendar-based, Recurring, Scheduled and Conditional actions
- Web browser, Email, Audio, Video, Windows and Application controls

SYSTEM REQUIREMENTS – STARDRAW CONTROL

- Windows 98, 2000 sp3, ME, XP sp2, Vista
- Microsoft .NET Framework 2.0
- 20Mb disk space
- USB port
- Internet connection for installation & updates

SYSTEM REQUIREMENTS – CONTROL PROGRAMS

- Windows 98, 2000 sp3, ME, XP sp2, Vista
- Microsoft .NET Framework 2.0
